PROFESSIONAL EXPERIENCE

STAFF SOFTWARE ENGINEER | Automation Anywhere Inc.

July 2021 – Present

Tech Stack: Java, RAG, LLMs, Python, Spring, Kubernetes, ActiveMQ, REST API, Postman, Github Copilot, Claude Code

- Led design and development of scalable, cloud-native microservices powering A360, improving system reliability and throughput.
- Acted as DRI for critical platform components, owning production health, on-call response, and system reliability for high-scale distributed services.
- Architected and implemented device session management and reconciliation systems, significantly improving observability and reducing system inconsistencies.
- Designed and deployed Kubernetes-based services to support next-generation agentic automation initiatives aligned with AI-driven workflows.
- Built internal AI-driven automation solutions leveraging LLMs and prompt engineering, reducing initial response time by 60%.
- Drove cross-team technical design discussions, authored design documents, and mentored engineers on building extensible, maintainable systems.
- Introduced semantic versioning and deployment standardization for distributed agents, enabling consistent and reliable global releases.
- Partnered with product and platform teams to define system requirements and deliver scalable backend services.

SOFTWARE ENGINEERING TEAM LEAD | Opal Organization

June 2020 – May 2021

Tech Stack: Python, JavaScript, React Native, AWS, REST API, Postman

- Led development of a cross-platform mentorship app using React Native, connecting over 1,000 mentees and mentors.
- Designed and implemented a dynamic Python-based matching algorithm, improving match relevance and engagement.
- Orchestrated end-to-end delivery with executive stakeholders, ensuring high usability and alignment with business goals.
- Directed sprint planning, code reviews, and technical guidance, fostering team alignment and execution velocity.

PRACTICUM STUDENT | Rubrik Inc.

January 2020 – June 2021

Tech Stack: JavaScript, HTML, CSS, Python, Python-Flask, MySQL, REST API

- Built an ML-based lead scoring model to identify high-potential sales leads, increasing targeting precision.
- Developed a Flask-based RESTful dashboard to visualize lead metrics, enabling real-time marketing insights.

SOFTWARE ENGINEERING INTERN | Crest Infosystems Pvt. Ltd.

December 2018 – April 2019

Tech Stack: TypeScript, XML, PHP, JavaScript, HTML, CSS, MySQL, REST API, JSON, Ionic Framework

- Created a mobile sales insights app in TypeScript using Ionic Framework; supported market analysis and reporting.
- Handled ~100,000+ records via MySQL; implemented performant REST APIs for CRUD workflows.
- Built an admin panel in PHP to meet a stretch goal, collaborating directly with executive stakeholders.

SOFTWARE ENGINEER INTERN | Bazinga Softtech Pvt. Ltd.

May 2018 – June 2018

Tech Stack: Java, Android, XML, Firebase, JSON

- Developed a weather forecasting Android app using OpenWeatherMap API; later integrated into the company's core app.
- Applied OOP principles to design reusable, scalable code modules.

EDUCATION

SANTA CLARA UNIVERSITY | MS in Information Systems, GPA: 3.68/4

Sep 2019 – June 2021

UKA TARSADIA UNIVERSITY | B. TECH in Information Technology, GPA: 3.51/4

August 2015 – May 2019

- *Relevant Coursework:* Data Structures and Algorithms, Design & Analysis of Algorithms, Java Technologies, Object Oriented Programming with C++, Advanced Database Management Systems, Web Technologies, Machine Intelligence

SKILLS

- **Languages:** Java (Core, Spring, Hibernate), JavaScript (ES6, ReactJS, Node.js, TypeScript), Python, PHP, SQL, HTML, CSS
- **AI/ML & LLM Systems:** RAG, LangChain, ChromaDB, Vector Search, Prompt Engineering
- **Databases:** Sql Server, MySQL, SQLite, NoSQL, PostgreSQL, Firebase, Oracle
- **Cloud & Infrastructure:** Kubernetes, Docker, AWS, GCP, CI/CD Pipelines
- **Messaging & APIs:** ActiveMQ, Websockets, REST API, JSON, Protocol Buffers
- **Frameworks & Tools:** Git, Github Copilot, Jenkins, Spring Boot, Flask, React Native, FastAPI, Microservices, Ionic, Postman, TestNG, RestAssured, Mockito

PROJECTS

Knowledge Assistant | Tech Stack: RAG, LangChain, ReactJS, Python, FastAPI, ChromaDB, SQLite, Git, JWT Auth

- Designed and built a production-grade RAG system enabling natural language querying over structured and unstructured data.
- Developed full-stack application using ReactJS and FastAPI, integrating LLMs via LangChain and vector search using ChromaDB.
- Implemented prompt engineering strategies and context retrieval pipelines to improve response accuracy and relevance.
- Built streaming response APIs for real-time conversational experiences.
- Designed multi-tenant architecture with authentication, role-based access control, and scalable API services.
- Optimized retrieval latency and system performance for scalable AI query workloads.
